

Convert  $\frac{6}{5}$  hour to minutes.

1) Replace the word "hour" with 60 minutes.

$$\frac{6}{5} \text{ hour} = \frac{6}{5} \cdot 60 \text{ minutes}$$

$$= 6 \cdot \frac{60}{5} \text{ minutes} \quad \text{regroup the 60 and 5 to divide}$$

$$= 6 \cdot 12 \text{ minutes} \quad \text{do the division}$$

$$= 72 \text{ minutes} \quad \text{multiply 6 by 12 to get 72}$$

Basic Principle of Life: Do WHATEVER it takes, for as long as it takes!
